Annual Update Notes

For this update we have done our annual update of Mexican Postal codes. Our data provider has updated its processing methodology for Mexican postal data to achieve full alignment with the **Servicio Postal Mexicano** (official Mexican Postal Service) standards. Previously, the methodology frequently associated redundant city names with individual postal codes and sometimes excluded the asentamientos (local administrative division). The new alignment incorporates these local divisions, resulting in a more accurate, streamlined dataset that eliminates previous naming redundancies. This refinement has led to a significant reduction in total record counts, reflecting higher data precision and the removal of inaccurate city-to-code associations.
