DRTrack 24.1.1 (May 2024)

Modified on: Fri, 17 May, 2024 at 2:35 PM

DRTrack 24.1.1 hotfix should now be available to all customers.

Enhancements

- The maximum number of assets shown in month view on [the Route Calendar](#) is limited to 39. A new message has been added to reflect this:

Bug Fixes

- Fixed an issue with the Route Calendar where users were getting an error message when switching the View to the Details view.
- Optimized the `usp_GetOrderEventsByTypesAndDate` stored procedure.
- Optimized the `usp_GetRouteDetailDataByRTIDs` stored procedure.
- Fixed an issue where filters were not honored with the [GetOrderDetailsByModifiedDateAndBranchids](#) [webservice call](#)
- Fixed an issue with the [GetRouteDetailByModifiedDate](#) [webservice call](#) where no data was returned. Making subsequent calls would return data.
- Fixed an issue with the picture preview functionality when trying to view at the order level. The preview functionality would not display a preview for all attachments associated with each order.
