

# DRTrack 25.2 Release Notes (July 2025)

Modified on: Tue, 1 Jul, 2025 at 9:56 PM

## New Features

A new Task was added to the Branch Task list specifically for Fixed Route customers who use Master Routes.

- The new task is an enhanced version of the Fixed Route Task and allows users to control cloning by each daycode.
- The new Branch task is called Enhanced Fixed Route and is listed under branch tasks.
- The original Fixed Route task and Enhanced Fixed Route tasks cannot both be configured to run simultaneously.
  - Users should decide which task should be configured per branch.

# Enhancements

- Removed the Day of week element from Route Export Service Stop arrival and departure.
- Added a Finalized notification to be sent to Appian Enterprise after the route is finalized.
- Added more use cases for a re-export and re-finalize flag based on user interaction to an order.

# Bug Fixes

- Fixed an issue where existing accounts exported to Peoplenet would create new landmarks in Pnet.
- Fixed an issue where some data was not returned when called with specific parameters in `GetRouteDetailsByModifiedDate`.
- Fixed an issue where tasks were starting at different times than the scheduled times.
- Added logging to help determine why `FixedTimes` were occasionally not updating in the DB when imported.
- Fixed an issue where `GetOrderDetailByModifiedDate` would return no data with certain parameters.
- Fixed an issue where `GetMasterRoutes` call fails.
