Warnings

Important information. Please read before upgrading.

Installation warning

Starting in version 2020.4, you **must** install the TMWSuite files into a new directory. Some files from earlier versions are not compatible with V.2020.4 and greater. If you need assistance, please work with your support team.

2025.3

This section contains system requirements and resolved issues for the latest release. There are no enhancements for this version.

Note: Before upgrading your production environment, Trimble recommends that you read the system requirements and install the latest version in a test environment. If you have questions, please contact your customer representative.

Requirements

Before you begin installing **TMWSuite version 2025.3**, check that these requirements are met:

- **Internet Information Services (IIS) for Microsoft® Windows Server®**

  IIS Microsoft Windows Server 2016 or later

- **Microsoft® SQL Server®**

  Microsoft SQL Server 2016, SQL Server 2017, SQL Server 2019, and SQL Server 2022 are certified for use with this application. Trimble Transportation recommends using the latest service pack of whichever version you use.

- **.NET Framework 4.6.2 or later**

- **Microsoft Visual C++ 2010 x 86 Redistributables**

- **32-bit SQL Native Client Drivers**

  Version 10, 11, or MS OLE DB must match the drivers to your SQL version.

- **You must be logged into the system where you want to install TMWSuite, and have administrator rights for that system.**

  Like most applications, TMWSuite can be installed locally on a user's system. It is also possible to install TMWSuite on a network drive. To do so, you must be logged into the system where the drive is physically located, and have administrator rights for that system.

Resolved issues

- **TTESUITE-211472**

  Previously, changes made to the `GP_AccountNumberDelimiter` General Info Table setting only applied to Invoicing and Settlements. Now, they also apply to Dispatch.

- **TTESUITE-212591**

  When upgrading TMWSuite, some errors occurred when applying the database upgrade script for those using SQL Server versions that were earlier than 2019.
