TotalMail® System 2022 Release Notes

These release notes contain:

- Enhancements (new or updated features)

- Resolved issues (application improvements)

22.1

Enhancements

Omnitracs Hours of Service

Improved logging for Omnitracs hours of service (TTESUITE-201198)

Previously, drivers using Omnitracs had to correct their hours of service within two days. Now, drivers can correct their hours at any time and TotalMail® updates the TMS.

Hosted Email Providers

Added support for hosted email providers (TTESUITE-201556)

TotalMail did not support hosted email providers. Now, it can send email, such as notifications, with Google and Office365 hosted providers.

Resolved issues

PeopleNet and Omnitracs Hours of Service

- TTESUITE-110939

PeopleNet® and Omnitracs hours of service could not run at the same time. This issue only affected clients who use both PeopleNet and Omnitracs.

Omnitracs One Data on XRS Pollers

- TTESUITE-201185

The Omnitracs XRS poller crashed and displayed many errors when collecting Omnitracs One data.
