TotalMail® System 2024.1 Release Notes

These release notes contain some or all of this information for each release:

- Warnings (read these if they are included)
- Requirements (what you must have before you install this software release)
- Enhancements (new or updated features)
- Resolved issues (application improvements)

Note: Before you upgrade your production environment, Trimble **_strongly_** recommends that you read any warnings and requirements. Then, install the latest version in a test environment.

If you have questions, contact your Trimble customer representative.

Resolved issues

- **TTESUITE-206100**

  Database issue

  The tmail_ShiftScheduleLogin_Enhanced3 stored proc now uses the "@trlId" field to set the trailer on the event record.
