TM-155540 Performance: "Find In Tree" option in Zone Code Definition is taking over an hour to run in some cases

This case improved the performance of "Find In Free" for a zone code when there are big zone data volumes in the TruckMate system.

Application	21.1
Codes.exe	21.1.16.1

TM-155613 If there is more than one FB the macro is sent to the Pickup Device instead of the Driver ID

This case fixed the bug that when both Samsara Driver and Samsara Asset are assigned to an P&D trip, in load offer message the Samsara Driver device id didn't show as the associated device in the pickup stops.

Application	20.4
MadWinServiceHost.exe	20.4.44.2

TM-155952 Validate & Geocode is not working for Street Level mileage

Fixed an issue where the ability to validate and geocode Australian and New Zealand zones was not working as expected. This has now been corrected with the addition of a new App Config and new logic to ensure the validations are correct as expected.

NOTE: With this fix, customers who use an on-premise version of a worldwide edition of PCMLER will need to set the new Application Configuration, "MILESERV.EXE > Country Abbreviation Type" to match what is setup inside PCMLER - this will be either be FIPS or ISO2. The default is FIPS; if a customer uses ISO2, they will need to switch the Config to align.

- Fixed an issue where a Freight Bill is marked as a 'Delivery' rather than an 'Intermediary Stop' when being dropped at a different Terminal to that of the End Zone.
- Fixed an issue where Freight Bills would still contain a 'Pickup' stop even if the Freight Bill was marked as "picked" at the Terminal.
- Fixed an issue where the Load Offer screen would not show a bill as being dropped at the 'Terminal' if a direct pick/drop was being done at that location.
- Fixed an issue where manifested Trips were not correctly display an 'Intermediary Stop', rather than a Delivery.

In this specific case, added logic to ensure that Bill List would only be available to use in specific grids that support Multi Container logic. The new Bill List functionality is available in:

- Dispatch - Freight Bill Grid - Intermodal > Multi Cont.
- MMDisp - Deliveries Grid - Intermodal > Multi Cont.
- MMDisp - Pickups Grid - Intermodal > Multi Cont.
- MMDisp - CrossDock Grid - Intermodal > Multi Cont.
